Projects

Management panel, Finland

JavaScript developer, duration 01.2017 – till now

Description:

We developed a car rent mobile app from scratch. The application generates keys that allow you to open your favorite auto via Bluetooth. A user adds scan of a driving license and ID, the map displays all cars. So a driver can choose a car and promptly rent it. Payment is automatically charged at the end of a trip / use. The app also includes Google Maps, a proprietary navigation system, instant messaging.
